Interview Summary

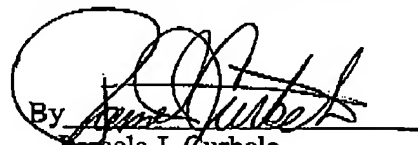

Sir:

This Interview Summary is in response to a telephone conference with the Examiner on September 8, 2004. During the interview, the language of Claim 1 was discussed. Specifically, it was agreed that the wherein clause provided two limitations, namely that "the storage media has a thickness of about 0.8 mm to about 2.5 mm", and that "when the energy field contacts the storage media, the energy field is incident upon the data layer before it could be incident upon the substrate".

If there are any charges with respect to this Interview Summary or otherwise, please charge them to Deposit Account No. 07-0862.

Respectfully submitted,

CANTOR COLBURN LLP
